**TOWARD ZERO WASTE**

**WHO WE ARE**

Waste Ninja is an innovative, 100% Australian-owned waste management company with a specialist focus on the source-separation, collection, transportation and recycling of food waste. We help Australians divert their food waste from landfill by providing convenient/transparent food waste recycling solutions.

**WHY IT'S IMPORTANT TO RECYCLE YOUR FOOD WASTE**

The problem	Why you should recycle your food waste
Australians send 7 million tonnes of organic waste to landfill each year, releasing methane, a greenhouse gas 20 times more potent than CO <sub>2</sub> , into the atmosphere. Landfill is also very expensive and won't last forever, with most major cities across Australia predicted to run out of capacity by 2030.	<ul style="list-style-type: none"> <li>✓ Reduce your reliance on landfill</li> <li>✓ Turn your organic waste into useful assets including renewable energy, compost and fertiliser</li> <li>✓ Reduce your carbon footprint</li> </ul>

**WHAT WE DO**

Provide separate food waste bins & compatible compostable products, including bin liners

Collect your food waste

Transport the waste to our approved organics recycling facilities

**WHAT HAPPENS TO YOUR FOOD WASTE**

1. Your food waste is transported to one of our organics recycling facilities

2. Microorganisms digest the valuable nutrients contained within the organic matter

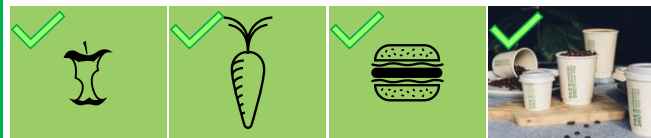

3. Renewable energy and organic fertiliser is produced
